📍 Sofia, Bulgaria

SUMMARY

I'm a Full Stack Developer with experience in end-to-end product development, specializing in IoT systems. I take products from concept through to deployment, building intuitive interfaces and optimizing data processing for high-performance, scalable solutions across front-end and back-end technologies.

TECH STACK

ReactJS

JavaScript

HTML

CSS

TypeScript

NodeJS

PostgreSQL

Git

EXPERIENCE

Full-stack Developer

ADD Bulgaria Ltd., Sofia

📅 April 2023 - Present

- Developed software solutions for the digital transformation of street lighting, enabling remote management and real-time monitoring of electrical systems
- Built user interfaces with React, TypeScript, Material-Tailwind, and Tailwind CSS, following Figma designs
- Built microservices for efficient data processing and retrieval
- Created and maintained Swagger documentation for APIs
- Utilized Keycloak for user management and federated authorization with Microsoft
- Set up CI/CD pipelines using Azure DevOps for seamless service deployment and updates

Front-end Developer

Novarto Ltd., Sofia

📅 July 2022 - December 2022

- Developed web applications using React, JavaScript, HTML5, CSS3
- Worked on integrating 3rd party APIs
- Communicated with stakeholders regarding project progress and development needs
- Attended development programs to gain competencies and boost skills set

RPA Developer

Service Centrix Ltd., Sofia

📅 June 2021 - July 2022

- Developed and implemented automation solutions to handle repetitive tasks and optimize business workflows for clients in the legal and finance industries
- Organized meetings with clients to discuss project needs and address development challenges
- Conducted product demos to showcase functionality and usability
- Provided ongoing support to resolve issues and ensure client satisfaction after deployment

EDUCATION

Bachelors in Mechatronics

Technical University of Sofia

📅 2018 - 2022
